An unprecedented political, economic, social, and legal storm was unleashed by the United Kingdom's June 2016 referendum to leave the European Union and the government's response to the vote. After decades of strengthening European integration and independence, Brexit necessitates a deep understanding of its international law implications on both sides of the English Channel in order to chart the stormy seas of negotiating and advancing beyond separation. In Complexity's Embrace, international law practitioners and academics from the United Kingdom, Europe, Canada and the United States look beyond the rhetoric of "Brexit Means Brexit" and "no agreement is better than a bad agreement" to explain the challenges that

need to be addressed in the diverse fields of trade, financial services, insolvency, intellectual property, environment, and human rights. The authors in this volume articulate, with unvarnished clarity, the international law implications of Brexit, providing policy makers, commentators, the legal community, and civil society with critical information they need to participate in negotiating their future within or outside Europe. Complexity's Embrace explores the many unprecedented questions about the UK's future trading arrangements. Contributors include Thomas Cottier, Armand de Mestral, Oonagh E. Fitzgerald, David A. Gantz, Markus Gehring, Valerie Hughes, Matthias Lehmann, Eva Lein, Dorothy Livingston, Richard Macrory, Luke McDonagh, Marc Mimler, Howard P. Morris, Gabriel Moss, Helen Mountfield, Federico M. Mucciarelli, Joe Newbiggin, Colm O'Connell, Damilola S. Olawuyi, Christoph G. Paulus, Maziar Peihani, Freedom-Kai Phillips, Stephen Tromans, Diana Wallis, and Dirk Zetzsche. This book is a critical examination of recently introduced individual accountability regimes that apply to the financial services industry in the UK (SMCR) and Australia (BEAR

and the forthcoming FAR), together with a forthcoming new individual accountability regime (in particular, SEAR) in Ireland. It provides a framework for analysing whether these regimes will achieve behavioural change in the financial services industry. This book argues that, whilst sanctioning individuals to deter future misconduct is an important part of any successful regulatory strategy, the focus should be on ensuring that individuals in the financial services industry internalise the norms of behaviour expected under the new regimes. In this regard, the analysis in this book is informed by criminological theory, regulatory theory and behavioural science. The work also argues for a "trajectory towards professionalisation" of financial services, and banking in particular, as an important means of positively influencing industry-wide norms of behaviour, which have a key influence on firms' and individuals' behaviours. Saunders and Cornett's Financial Institutions Management: A Risk Management Approach provides an innovative approach that focuses on managing return and risk in modern financial institutions. The central theme is that the risks faced by financial institutions managers and the methods and markets through which these risks are managed are becoming increasingly similar whether an institution is chartered as a commercial bank, a savings bank, an investment bank, or an insurance company. Although the traditional nature of each sector's product activity is analyzed, a greater emphasis

is placed on new areas of activities such as asset securitization, off-balance-sheet banking, and international banking. SGN. Drawing on the history of modern finance, as well as the sociology of money and risk, this book examines how cultural understandings of finance have contributed to the increased capitalization of the UK financial system following the Global Financial Crisis. Providing both a geographically-influenced analysis and re-appraisal of the concept of performativity, it demonstrates that financial risk management has a spatiality that helps to inform understandings and imaginaries of the risks associated with money and finance. The book traces the development of understandings of risk at the Bank of England, with an analysis that spans some 1,000 reports, documents and speeches alongside elite interviews with past and present employees at the central bank. The author argues that the Bank has moved from a relatively broad-brush approach to the risks being managed in the financial sector, to a greater preoccupation with the understanding and mapping of the mobilization of financial risk. The study of financial practices from a critical social sciences and humanities perspective has grown rapidly since the Global Financial Crisis and this book will be of interest

to multiple subject areas including IPE, economic geography, sociology of finance and critical security studies. This book takes, as its end point, the triggering of Article 50. This timely book examines the legal and regulatory implications of Brexit for financial services. The UK's withdrawal from the EU is likely to have significant market, political, and policy consequences for the UK financial system, for the single market and the euro area, and for the international financial system. As the UK disentangles its financial system from the EU, law will matter to a profound extent. Treaties, legislation, and regulation, at UK, EU, and international levels, and the many dynamics and interests which drive them, will frame and shape the ultimate settlement between the UK and the EU. Law will also shape how the EU financial system develops post-Brexit and how the international financial system responds. Written by leading authorities in the field, this book addresses and contextualises the legal, regulatory, and policy issues across five dimensions, which correspond to the major legal spheres engaged: financial regulation implications and market access consequences for the UK financial system; labour law and free movement consequences for the UK financial system; the implications internally for EU financial governance and the euro area; the implications and relevance of the EEA/EFTA financial services market; and the trade law and World Trade Organization law implications. The UK and Multi-level Financial Regulation

examines the role of the United Kingdom (UK) in shaping post-crisis financial regulatory reform, and assesses the implications of the UK's withdrawal from the European Union (EU). It develops a domestic political economy approach to examine how the interaction of three domestic groups - elected officials, financial regulators, and the financial industry - shaped UK preferences, strategy, and influence in international and EU-level regulatory negotiations. The framework is applied to five case studies: bank capital and liquidity requirements; bank recovery and resolution rules; bank structural reforms; hedge fund regulation; and the regulation of over-the-counter derivatives. It concludes by reflecting on the future of UK financial regulation after Brexit. The book argues that UK regulators pursued more stringent regulation when they had strong political support to resist financial industry lobbying. UK regulators promoted international harmonisation of rules when this protected the competitiveness of industry or enabled cross-border externalities to be managed more effectively; but were often more resistant to new EU rules when these threatened UK interests. Consequently, the UK was more successful at shaping international standards by leveraging its market power, regulatory capacity, and alliance building (with the US). But it often met with greater political resistance at the EU level, forcing it to use legal challenges to block reform or secure exemptions. The book concludes that political

and regulatory pressure was pivotal in defining the UK's 'hard' Brexit position, and so the future UK-EU relationship in finance will most likely be based on a framework of regulatory equivalence. This book addresses the questions of discrimination, vulnerable consumers, and financial inclusion in the light of the emerging legal, socioeconomic, and technological challenges. New technologies - such as artificial intelligence-driven consumer credit risk assessment and Fintech platforms, the changing nature of vulnerability due to the ongoing COVID-19 pandemic, as well as the sophistication of digital technologies, which help circumvent legal barriers and protections - necessitate the continuous study of the existing legal frameworks and measures that are capable of tackling these challenges. Organized in two major parts, the first addresses, from multiple national angles, the idea of a human rights approach to consumer law, in order to replace the mantra of economic efficiency that characterizes financial services with those of human dignity and freedom from discrimination and from debt-induced servitude. The second tackles the challenges posed by increased usage of technology in connection with financial services, which tends to solve, but also creates, additional issues for consumers in general, and for vulnerable groups in particular.
