[Criminal Investigation, Fourth Edition](#) Aug 08 2021 Criminal investigators need broad knowledge of such topics as criminal law, criminal procedure, and investigative techniques. The best resource for these professionals will distill the needed information into one practical volume. Written in an accessible style, the fourth edition of Criminal Investigation maintains the same reader friendly approach that made its predecessors so popular with students, professionals, and practitioners. Beginning with an overview of the history of criminal investigation, the book explores current investigative practices and the legal issues that constrain or guide them. It discusses the wide range of sources of information available, including the internet, individuals, state and local sources, and federal agencies and commissions. Next, the book discusses other investigative techniques, including interviewing and interrogation, informants, surveillance, and undercover operations. A chapter on report writing provides explicit instructions on how to capture the most critical information needed in an investigation. Additional chapters cover the crime scene investigation and the crime laboratory. The remainder of the book delves into the specific investigative protocols for individual crimes, including sex offenses, homicide, mass and serial murder, assault and robbery, property crimes, cybercrime, and narcotics. Concluding chapters focus on the police/prosecutor relationship and investigative trends. Each chapter includes a summary, a list of key terms, and review questions so that readers can test their assimilation of the material. Clear and concise, this book is an essential resource for every criminal investigator's toolbox. [Texas Criminal Procedure](#) Aug 28 2020 The third edition of Texas Criminal Procedure includes updated law and statutory citations, along with cases and notes that track new legal developments related to criminal procedure in Texas. While the book was originally written to help students on the Texas Bar Exam, it now focuses on fundamental legal concepts for students who are interested in Texas Criminal Procedure, and for those who ultimately want to practice criminal law in Texas. The book has practice questions at the end of each chapter designed to help students apply the law to fact patterns. Students and lawyers use this book as a desk reference to assist them in practice because of its exhaustive coverage of topics ranging from arrest to post-conviction relief. New to the Third Edition: Updated law and statutory citations. Legal notes that track new developments in caselaw. Edited practice questions. Professors and students will benefit from: An easy start-to-finish chronological organization. Clear, plain English writing. Practical nature of the substance of the book.

[Silvas Moves to Barton](#) May 25 2020 Sylvester Roland's friends called him Silvas, at six foot two and one-half, he is a big man. Solid muscle, he has large hands and knows how to use them. He is ruggedly good looking with short, dusty blond hair, steel blue eyes and a soft but deep voice. Silvas had joined the Navy after he graduated high school in 1964. He was tough as nails and became a Navy SEAL; he fought in Nam, served his country for 20 years, and retired a Commander. When Silvas retired the CIA Clandestine Service recruited him. For almost a quarter of a century Silvas fought the Colombian drug cartels. In 2007 with Colombian commandos, he found Juan Leon Montoya Valdez. Valdez, the head of the largest drug cartel in South America, died from a gunshot wound to the heart. Silvas was there before the commandos saw Valdez, Silvas shot and killed him, and took \$5,000,000. Silvas had leave and headed home to Arizona. After returning home he had a complete mental breakdown. Silvas spent two years at Bethesda Naval Hospital, Psychiatric Unit. Following his release he now needs a change of scenery. Silvas decides on Barton, Vermont a place where he can hunt and fish to his heart's content. Barton is more than a place to fish his cares away; it becomes the place Silvas finds the love of his life. The nightmare he has lived most of his life is over, he can pass the time with the woman who steals his heart. When the Valdez Family uncovers Sylvester's identity and plans to murder him, he is saved by his sixth sense. Now Silvas will have no choice but to return to the nightmare he thought he left. This time he will have to cut off the serpent's head.

Emissions Reduction Through Better Traffic Management Jul 19 2022 The objectives of this study were to: (1) evaluate a new low-cost approach for measuring on-road tailpipe emissions of highway vehicles; (2) investigate factors that affect the amount and variability of on-road emissions, using statistical methods; and (3) devise and demonstrate methods for designing and conducting observational experiments that realistically evaluate pollution prevention strategies for on-road vehicles. Portable instruments were used for measuring carbon monoxide (CO), nitric oxide (NO), and hydrocarbon (HC) emissions and vehicle activity (e.g., vehicle speed, engine parameters) on a second-by-second basis. Data collection, quality assurance, reduction, and analysis protocols were developed. Field data collection occurred in a pilot and an evaluation phase. In total, over 1,200 one-way trips were made with more than 20 vehicles, 4,000 vehicle-miles traveled, 160 hours of data, and 10 drivers. The pilot study was used to identify key factors influencing on-road emissions and as input to the design of the evaluation study. In the evaluation study, data were collected intensively with a small number of vehicles on two corridors before and after signal timing and coordination changes were implemented. For the first corridor, changes in signal timing and coordination did not result in a significant change in traffic flow or emissions. However, substantial reductions in emissions were estimated for uncongested versus congested traffic flow when comparing travel in the same direction at different times of day. For the second corridor, there were significant improvements in traffic flow and some reduction in emissions for three of the four time period and travel direction combinations evaluated. The impact of signal timing and coordination changes with respect to non-priority movements involving cross-streets was evaluated. For the first corridor, there was no statistically significant observed change in emissions for non-priority movements. For the second corridor, there typically was a decrease in average speed and an increase in emissions for non-priority movements; however, many of the observed changes were not statistically significant. The study also demonstrated other analysis methods, including: (a) macro-scale analysis of trip average emissions and traffic parameters; (b) micro-scale analysis of second-by-second emissions and vehicle operation; (c) mesoscale analysis of modal emission rates; and (d) spatial analysis of emissions at specific locations along the corridors. Both statistical and theoretical-based approaches were evaluated. The implications of the study results for pollution prevention strategies are discussed. Conclusions are presented regarding instrumentation, protocols, analysis techniques, and case study-specific findings. Recommendations are given regarding future applications of on-board measurements.

Problems and Materials on Debtor and Creditor Law Oct 30 2020 This straightforward, student-friendly book combines a popular problems approach with a well-balanced mix of text and cases to build a solid, nuts-and-bolts introduction to the Bankruptcy Code, statutory rules, and issues of bankruptcy law. Its sensible organization allows instructors to tailor coverage to their own approach. The seventh edition benefits from the addition of a new coauthor, Professor Bradley, of the University of Kentucky. New to the Seventh Edition: For this edition, the text has been completely rewritten, primarily by Professor Bradley, and the focus is now heavily on preparing attorneys for the real world problems they will encounter in a practice that focuses on bankruptcy and other debtor/creditor issues. There is a new chapter covering the new subchapter V of Chapter 11, which was introduced by the Small Business Reorganizations Act and which has proven very popular since it came into force in March of 2020. The book also features an extended treatment of 363 Sales, better reflecting modern practice realities as compared with how other books deal with this topic. Professors and student will benefit from: This edition has a more textual approach in explaining the difficulties of the law, adding many explanations of how to approach and handle the legal difficulties in this area as they arise. This edition features many straightforward diagrams to help students with different learning styles navigate the sometimes challenging concepts of bankruptcy law. The first chapter of this edition includes a simple but thorough summary of bankruptcy law, which makes it easier for students to place all the future chapters into context.

Genexus Sep 09 2021 When Mendel pioneered the early study of genetics, he probably never imagined anything like GENEXUS. Secretly funded and operated by VanGen Biotechnology Corporation, PROJECT GENEXUS is the design, creation, and maturation of six genetically engineered humans – males Derek, Dmitri, and David; and females Dianna, Daniela, and Dominique. Now ten years old, the GENEXUS children are already far superior to normal humans. They are faster, stronger and more agile; possess genius level IQs; and are resistant to virtually every known disease. They are distinguished by their light golden skin, pure white hair and jewel-colored eyes. Faced with the ethical risks and exorbitant costs of maintaining the illegal project, VanGen's founder and CEO, Charles Lincoln Vandergellan, decides to terminate the initiative, and along with it the GENEXUS children. Athena Gianopoulos, a beautiful young geneticist assigned to work with one of the children, accidentally learns of VanGen's plans. In an attempt to save them from being euthanized, Athena smuggles the children off the GENEXUS campus and into hiding. Desperate to recover the children and keep the program a secret, VanGen dispatches its private security team to find the scientist and resolve the situation ... by any means necessary. Fast-paced action, nail-biting suspense, and exciting twist and turns await readers in this tale of scientific discovery, friendship, love, betrayal, and survival.

Vehicle Compatibility in Automotive Crashes Apr 16 2022 For years, reducing the number of traffic-related fatalities and injuries has been a major problem throughout the world. Today, it has gained much more momentum in view of rapidly increasing SUV, van, and light-truck populations relative to the number of passenger cars, and due to significant improvements in technologies that facilitate a better understanding of the interaction dynamics among widely differing size vehicles. Unless disparities in crashworthiness among vehicles of different masses, sizes, and structural characteristics in mixed crash environments are successfully taken into account, the challenge toward improved vehicle safety will continue. This two-part

compendium provides the most comprehensive information available on the entire spectrum of vehicle crash compatibility. The first part presents oral comments captured from the 2003 SAE World Congress panel discussion on compatibility. The panel of leading experts representing industry, academia, and government provides a rough framework and a broad range of views on current and emerging developments in compatibility research. The second part of this compendium features 44 best technical papers from SAE International and the International Technical Conference on the Enhanced Safety of Vehicles, published from the early 1970s through 2004. Readers will get a feel for the direction passenger car and heavy-vehicle manufacturers, research institutions, infrastructure suppliers, insurers, and governments are taking to reduce the number of traffic fatalities and injuries.

Persuasive Communication Feb 14 2022 This updated and expanded edition of Persuasive Communication offers a comprehensive introduction to persuasion and real-world decision making. Drawing on empirical research from social psychology, neuroscience, business communication research, cognitive science, and behavioral economics, Young reveals the thought processes of many different audiences—from investors to CEOs—to help students better understand why audiences make the decisions they make and how to influence them. The book covers a broad range of communication techniques, richly illustrated with compelling examples, including resumes, speeches, and slide presentations, to help students recognize persuasive methods that do, and do not, work. A detailed analysis of the emotions and biases that go into decision making arms students with perceptive insights into human behavior and helps them apply this understanding with various decision-making aids. Students will learn how to impact potential employers, clients, and other audiences essential to their success. This book will prove fascinating to many, and especially useful for students of persuasion, rhetoric, and business communication.

Error Analysis and Uncertainty in Accident Reconstruction Sep 21 2022 The last ten years have seen explosive growth in the technology available to the collision analyst, changing the way reconstruction is practiced in fundamental ways. The greatest technological advances for the crash reconstruction community have come in the realms of photogrammetry and digital media analysis. The widespread use of scanning technology has facilitated the implementation of powerful new tools to digitize forensic data, create 3D models and visualize and analyze crash vehicles and environments. The introduction of unmanned aerial systems and standardization of crash data recorders to the crash reconstruction community have enhanced the ability of a crash analyst to visualize and model the components of a crash reconstruction. Because of the technological changes occurring in the industry, many SAE papers have been written to address the validation and use of new tools for collision reconstruction. Collision Reconstruction Methodologies Volumes 1-12 bring together seminal SAE technical papers surrounding advancements in the crash reconstruction field. Topics featured in the series include: • Night Vision Study and Photogrammetry • Vehicle Event Data Recorders • Motorcycle, Heavy Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

Introduction to Criminology Feb 20 2020 A unique text/reader that takes a comprehensive, interdisciplinary approach to the study of criminology Providing an affordable alternative to the standard textbook, this new edition of the authors' popular text/reader provides instructors and students the best of both worlds – authored text with carefully selected accompanying readings. Now thoroughly updated with new articles, new content, and new statistics, tables, and figures, this Second Edition provides an interdisciplinary perspective on crime and criminality that incorporates the latest theories, concepts, and research from sociology, psychology, genetics, evolutionary biology, and the neurosciences. The new edition is divided into 15 sections that mirror chapters in a typical criminology textbook. New to This Edition: A new Section 11 on Mass Murder and Terrorism makes coverage of these high-interest topics even more accessible. Section 10 now focuses only on murder, rape, robbery, aggravated assault, and domestic violence, making it easier for students to absorb the material. New articles appear in the structural theories section, the sections devoted to violent crime, and throughout the text/reader as needed. The authors now more closely link sections on types of crime to sections on theory to give readers a more cohesive understanding of the connections between the two. Contemporary criminologists' favored theories (drawn from a survey of 770 criminologists) now appear in a table to give readers insight into the professional opinion today on criminological theories. Features: Each Section has a 15-page introduction (a "mini-chapter") that contains vignettes, photos, tables and graphs, end-of-chapter questions, and Web exercises, followed by three to four supporting readings. Theory Section introductions contain a unique table that compares and contrasts the theories presented, while theory concluding sub-sections focus on policy and crime prevention. A "How to Read a Research Article" guide (which appears prior to the first reading) illustrates key aspects of a research article. The book's readings are drawn from carefully selected, edited journal articles appropriate for an undergraduate audience.
