## Greg Egan Read Pdf Free

**Luminous** Mar 15 2022 LUMINOUS collects together one original story plus nine previously unpublished in book form. Greg Egan's short fiction is at the cutting edge of the genre. His stories range from near future predictions to far future, far space improvisations. His grasp of the latest scientific breakthroughs is unparalleled in science fiction. The stories include 'Transition Dreams', 'Cocoon', 'Our Lady of Chernobyl', the title story 'Luminous' and 'The Planck Drive'.

Egan's particular interests range from the farther shores of chaos theory and black hole science to biotechnology and cloning.

**Isolation** Jul 07 2021 Une belle nuit, il y a trente-trois ans, les étoiles ont disparu. La Terre et avec elle l'humanité se retrouvent isolées dans une Bulle cosmique centrée sur le soleil, placées en quarantaine. Pourquoi ? Par qui ? Les hypothèses dégénèrent en cultes religieux insolites et souvent malsains. Et dans le même temps,

l'humanité a appris à vivre dans les mondes virtuels. Ou bien est-ce tout l'univers qui serait devenu virtuel ? La clé du mystère serait-elle détenue par Laura Andrews, trente-trois ans, l'âge exact de la Bulle ? Mais Laura a disparu. Et les Possibles se déchaînent. Un roman quantique, éblouissant, par la grande révélation de ces dernières années, Greg Egan, écrivain australien, dont certains prétendent, puisque personne ne l'a jamais rencontré, qu'il serait un programme

informatique, le premier auteur artificiel.

Perihelion Summer

May 05 2021 Greg Egan's Perihelion Summer is a story of people struggling to adapt to a suddenly alien environment, and the friendships and alliances they forge as they try to find their way in a world where the old maps have lost their meaning.

Taraxippus is coming: a black hole one tenth the mass of the sun is about to enter the solar system. Matt and his friends are taking no chances. They board a mobile aquaculture rig, the Mandjet, self-sustaining in food, power and fresh water, and decide to sit out the encounter off-shore.

As Taraxippus draws nearer, new observations throw the original predictions for its trajectory into doubt, and by the time it leaves the solar system, the conditions of life across the globe will be changed forever. Praise for Perihelion Summer “Egan here doubles down on climate change with his typically rigorous exploration of a cosmic accident’s effect on Earth and all its people. His characters are sharp and funny and their courageous response to the massive challenge they face works as a spur to cause us to think—why couldn’t we do as well with our own great challenge?”

This is what the best science fiction can do that no other genre can, and we need it now more than ever. Bravo!” — Kim Stanley Robinson At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Axiomatic** Dec 24 2022 THE HUNDRED LIGHT YEAR DIARY - Scientists can bounce messages from the future back to the present, but there's no guarantee they'll tell the truth ... LEARNING TO BE ME - Crystalline minds may take the place of human brains, but where does the self really lie? CLOSER - Lovers exchange

bodies and minds,  
but their  
experiments go just  
that little bit too  
far, proving that  
you can have too  
much of a good  
thing

### **The Candy House**

May 25 2020

PULITZER PRIZE-  
WINNING AUTHOR  
OF A VISIT FROM  
THE GOON SQUAD

From one of the  
most dazzling and  
iconic writers of our  
time comes an  
electrifying, deeply  
moving novel about  
the quest for  
authenticity,  
privacy, and  
meaning in a world  
where our  
memories are no  
longer our own--  
featuring  
characters from A  
Visit from the Goon  
Squad. It's 2010.  
Staggeringly  
successful and  
brilliant tech

entrepreneur Bix  
Bouton is desperate  
for a new idea. He's  
forty, with four  
kids, and restless  
when he stumbles  
into a conversation  
with mostly  
Columbia  
professors, one of  
whom is  
experimenting with  
downloading or  
"externalising"  
memory. Within a  
decade, Bix's new  
technology, Own  
Your Unconscious--  
that allows you  
access to every  
memory you've ever  
had, and to share  
every memory in  
exchange for access  
to the memories of  
others--has seduced  
multitudes. But not  
everyone. In  
spellbinding linked  
narratives, Egan  
spins out the  
consequences of  
Own Your  
Unconscious

through the lives of  
multiple characters  
whose paths  
intersect over  
several decades.  
Intellectually  
dazzling and  
extraordinarily  
moving, The Candy  
House is a bold,  
brilliant imagining  
of a world that is  
moments away.  
With a focus on  
social media,  
gaming, and  
alternate worlds,  
you can almost  
experience moving  
among dimensions  
in a role-playing  
game. Egan takes  
her "deeply  
intuitive forays into  
the darker aspects  
of our technology-  
driven, image-  
saturated culture"  
(Vogue) to stunning  
new heights and  
delivers a fierce  
and exhilarating  
testament to the  
tenacity and

transcendence of human longing for real connection, love, family, privacy and redemption.

### **The Clockwork**

#### **Rocket** Dec 12

2021 In Yalda's universe, light has no universal speed and its creation generates energy. On Yalda's world, plants make food by emitting their own light into the dark night sky. As a child, Yalda witnesses one of a series of strange meteors, the Hurlters, that are entering the planetary system at an immense, unprecedented speed. It becomes apparent that her world is in imminent danger — and the task of dealing with the Hurlters will require knowledge

and technology far beyond anything her civilization has yet achieved! Only one solution seems tenable: if a spacecraft can be sent on a journey at sufficiently high speed, its trip will last many generations for those on board, but it will return after just a few years have passed at home. The travelers will have a chance to discover the science their planet urgently needs, and bring it back in time to avert disaster.

*Tomorrow's Parties*  
Sep 28 2020 Twelve visions of living in a climate-changed world. We are living in the Anthropocene—an era of dramatic and violent climate change featuring

warming oceans, melting icecaps, extreme weather events, habitat loss, species extinction, and more. What will life be like in a climate-changed world? In *Tomorrow's Parties*, science fiction authors speculate how we might be able to live and even thrive through the advancing Anthropocene. In ten original stories by writers from around the world, an interview with celebrated writer Kim Stanley Robinson, and a series of intricate and elegant artworks by Sean Bodley, *Tomorrow's Parties* takes rational optimism as a moral imperative, or at least a pragmatic alternative to

despair. In these stories—by writers from the United Kingdom, the United States, Nigeria, China, Bangladesh, and Australia—a young man steals from delivery drones; a political community lives on an island made of ocean-borne plastic waste; and a climate change denier tries to unmask “crisis actors.” Climate-changed life also has its pleasures and epiphanies, as when a father in Africa works to make his son’s dreams of “Viking adventure” a reality, and an IT professional dispatched to a distant village encounters a marvelous predigital fungal network.

Contributors include Pascall Prize for Criticism winner James Bradley, Hugo Award winners Greg Egan and Sarah Gailey, Philip K Dick Award winner Meg Elison, and New York Times bestselling author Daryl Gregory.

**Diaspora** Nov 23 2022 A quantum Brave New World from the boldest and most wildly speculative writer of his generation. Since the Introduction in the twenty-first century, humanity has reconfigured itself drastically. Most chose immortality, joining the polises to become conscious software. Others opted for gleisners: disposable, renewable robotic

bodies that remain in contact with the physical world of force and friction. Many of these have left the solar system forever in fusion-drive starships. And there are the holdouts: the fleshers left behind in the muck and jungle of Earth—some devolved into dream apes, others cavorting in the seas or the air—while the statics and bridgers try to shape out a roughly human destiny. But the complacency of the citizens is shattered when an unforeseen disaster ravages the fleshers and reveals the possibility that the polises themselves might be at risk from bizarre astrophysical

processes that seem to violate fundamental laws of nature. The orphan Yatima, a digital being grown from a mind seed, joins a group of citizens and flesher refugees in a search for the knowledge that will guarantee their safety—a search that puts them on the trail of the ancient and elusive Transmuters, who have the power to reshape subatomic particles, and to cross into the macrocosmos, where the universe we know is nothing but a speck in the higher-dimensional vacuum. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers

interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

### **Crystal Nights and Other Stories**

Apr 04 2021 A representative

sampling of Hugo winner Egan's distinctive hard science fiction drawing from previously uncollected stories. [Distress](#) Sep 21 2022 On the utopian, man-made island, Stateless, Nobel Prize winner Violet Mosala is close to solving the greatest problem of her career - the quest for the ultimate Theory of Everything (TOE) is almost over. Burned out by recording the abuses of biotech for his TV news syndicate, Andrew Worth grabs the chance to follow Violet's story. In contrast the world of theoretical physics seems like an anaesthetised mathematical heaven, where

everything is cool and abstract. He could not have been more wrong. One by one Mosala's rival quantum physicists are disappearing from the scientific summit at Stateless. But why? Is it something to do with Violet herself, or is there some other, more esoteric, force at work undermining the Theory of Everything Conference?

**Everfair** Dec 20 2019 From noted short story writer Nisi Shawl comes a brilliant alternate-history novel set in the Belgian Congo. What if the African natives developed steam power ahead of their colonial oppressors? What might have come of Belgium's

disastrous colonization of the Congo if the native populations had learned about steam technology a bit earlier? Fabian Socialists from Great Britain join forces with African-American missionaries to purchase land from the Belgian Congo's "owner," King Leopold II. This land, named Everfair, is set aside as a safe haven, an imaginary Utopia for native populations of the Congo as well as escaped slaves returning from America and other places where African natives were being mistreated. Shawl's speculative masterpiece manages to turn

one of the worst human rights disasters on record into a marvelous and exciting exploration of the possibilities inherent in a turn of history. Everfair is told from a multiplicity of voices: Africans, Europeans, East Asians, and African Americans in complex relationships with one another, in a compelling range of voices that have historically been silenced. Everfair is not only a beautiful book but an educational and inspiring one that will give the reader new insight into an often ignored period of history. At the Publisher's request, this title is being sold without Digital Rights

Management  
Software (DRM)  
applied.

### **The Eternal**

**Flame** Sep 09 2021  
The generation ship  
Peerless is suffering  
from a population  
explosion, and the  
only way to reduce  
the number of  
children is by  
drastically limiting  
the females' food  
intake. So  
population control  
consists of two  
barbaric choices:  
starvation, or  
suicide. Trying to  
find a better way, a  
biologist starts  
experimenting with  
animals, and  
stumbles on a  
technique that  
radically alters the  
reproductive cycle.  
But while the  
advantages are  
obvious, there's a  
major drawback:  
while it spares  
women from their

old role -  
reproduction  
without hope of  
survival - it will  
essentially wipe out  
an entire sex. Amid  
the turmoil created  
by this new  
possibility,  
physicists on the  
ship are working to  
develop the  
technology they will  
need to complete  
the mission of the  
Peerless. One of the  
expedition's  
founders dreamed  
of discovering the  
Eternal Flame: a  
way to generate  
thrust without  
consuming any fuel  
at all. The  
inhabitants on  
board the Peerless  
have some hard  
choices to make -  
and the wrong one  
could spell  
extinction for their  
entire race.  
*Dichronauts* Nov 11  
2021 Seth is a

surveyor, along  
with his friend  
Theo, a leech-like  
creature running  
through his skull  
who tells Seth what  
lies to his left and  
right. Theo, in turn,  
relies on Seth for  
mobility, and for  
ordinary vision  
looking forwards  
and backwards.  
Like everyone else  
in their world, they  
are symbionts,  
depending on each  
other to survive. In  
the universe  
containing Seth's  
world, light cannot  
travel in all  
directions: there is  
a "dark cone" to the  
north and south.  
Seth can only face  
to the east (or the  
west, if he tips his  
head backwards). If  
he starts to turn to  
the north or south,  
his body stretches  
out across the  
landscape, and to

rotate to face north-east is every bit as impossible as accelerating to the speed of light. Every living thing in Seth's world is in a state of perpetual migration as they follow the sun's shifting orbit and the narrow habitable zone it creates. Cities are being constantly disassembled at one edge and rebuilt at the other, with surveyors mapping safe routes ahead. But when Seth and Theo join an expedition to the edge of the habitable zone, they discover a terrifying threat: a fissure in the surface of the world, so deep and wide that no one can perceive its limits. As the habitable zone continues to move,

the migration will soon be blocked by this unbridgeable void, and the expedition has only one option to save its city from annihilation: descend into the unknown. Zeitgeber Aug 28 2020 For millions of years, life on Earth has taken its cues from the rising and setting of the sun, and for most of human history we've followed the same rhythm. But if that shared connection was broken, and we each fell under the sway of our own private clock, could we still hold our lives together? One family is about to find out. At the Publisher's request, this title is being sold without Digital Rights Management

Software (DRM) applied.

**The Four Thousand, the Eight Hundred** Jan 01 2021 First published in Asimov's Science Fiction, December 2015.

*Quarantine* Aug 20 2022 It's late in the 21st century and bioengineering is now so common that people are able to modify their minds in any way they wish. It is an era which has been shaped by information systems so vast that security, in any form, is easily breached. Now you can be whatever you want to be, and do whatever you want to do. On Earth anyway. One night, thirty three years ago, the stars went out. 'The

Bubble' - a perfect sphere centred on the sun - appeared in the sky, isolating the solar system from the rest of the universe. For thirty-three years, humanity has lived with the religious cults and terrorism which spawned in the wake of the darkness. We are now alone.

Humanity has been cut off.

Quarantined.

Zendegi May 17 2022 Nasim is a young computer scientist, hoping to work on the Human Connectome Project: a plan to map every neural connection in the human brain. But funding for the project is cancelled, and Nasim ends up devoting her career to Zendegi, a computerised

virtual world used by millions of people. Fifteen years later, a revived Connectome Project has published a map of the brain. Zendegi is facing fierce competition from its rivals, and Nasim decides to exploit the map to fill the virtual world with better Proxies: the bit-players that bring its crowd scenes to life. As controversy rages over the nature and rights of the Proxies, a friend with terminal cancer begs Nasim to make a Proxy of him, so some part of him will survive to help raise his orphaned son. But Zendegi is about to become a battlefield ...

**The Best of Greg Egan** Feb 26 2023

Greg Egan is arguably Australia's greatest living science fiction writer. In a career spanning more than thirty years, he has produced a steady stream of novels and stories that address a wide range of scientific and philosophical concerns: artificial intelligence, higher mathematics, science vs religion, the nature of consciousness, and the impact of technology on the human personality. All these ideas and more find their way into this generous and illuminating collection, the clear product of a man who is both a master storyteller and a rigorous, exploratory thinker. **The Best of Greg Egan** contains

twenty stories and novellas arranged in chronological order, and each of them is a brilliantly conceived, painstakingly developed gem, including the Hugo Award-winning novella "Oceanic", a powerful account of a boy whose deeply held religious beliefs are undermined by what he comes to learn about the laws of the physical world. This book really does represent the best of Greg Egan, and it therefore takes its place among the best of contemporary SF. Startling, intelligent and always hugely entertaining, it provides an ideal introduction to one of the most

accomplished and original writers working today. This is an important and provocative collection, and it deserves a place on the serious science fiction reader's permanent shelf.

### **Uncanny Valley**

Jun 25 2020

Immortality, but at what price, in what form, and how could you be you? In the near future it's possible to build a new you, a better you, one that could carry on forever. But if you could carry on, if you could make choices about who you would be forever, how much of your past would you bring with you? Would you be tempted to maybe...edit? Adam isn't all that he used to be, but he

wants to be. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

### New Boundaries in Political Science

Fiction Apr 23 2020

Surveying the vast expanse of politically-charged science fiction, this book posits that the defining dilemma for these tales rests in whether identity and meaning germinate from progressive linear changes or progress, or from a continuous return to primitive realities of war, death and the competition for survival.

**Phoresis** Feb 02 2021 Welcome to Tvíbura and Tvíburi, the richly imagined twin

planets that stand at the center of Greg Egan's extraordinary new novella, Phoresis. These two planets...one inhabited, one not...exist in extreme proximity to one another. As the narrative begins, Tvíbura, the inhabited planet, faces a grave and imminent threat: the food supply is dwindling, and the conditions necessary for sustaining life are growing more and more erratic. Faced with the prospect of eventual catastrophe, the remarkable women of Tvíbura launch a pair of ambitious, long-term initiatives. The first involves an attempt to reanimate the planet's

increasingly dormant ecosphere. The second concerns the building of a literal "bridge between worlds" that will connect Tvíbura to its (hopefully) habitable sibling. These initiatives form the core of the narrative, which is divided into three sections and takes place over many generations. The resulting triptych is at once an epic in miniature, a work of hard SF filled with humanist touches, and a compressed, meticulously detailed example of original world building. Most centrally, it is a portrait of people struggling...and sometimes risking everything...to preserve a future

they will not live to see. Erudite and entertaining, Phoresis shows us Egan at his formidable best, offering the sort of intense, visionary pleasures only science fiction can provide.

#### Permutation City

Oct 22 2022 The story of a man with a vision -

immortality : for those who can afford it is found in cyberspace.

Permutation city is the tale of a man with a vision - how to create immortality - and how that vision becomes something way beyond his control.

Encompassing the lives and struggles of an artificial life junkie desperate to save her dying mother, a

billionaire banker scarred by a terrible crime, the lovers for whom, in their timeless virtual world, love is not enough - and much more - Permutation city is filled with the sense of wonder.

### **Evaporating**

**Genres** Oct 18

2019 A series of provocative essays on how the fantastic genres evolve and grow In this wide-ranging series of essays, an award-winning science fiction critic explores how the related genres of science fiction, fantasy, and horror evolve, merge, and finally "evaporate" into new and more dynamic forms. Beginning with a discussion of how literary readers "unlearned" how to

read the fantastic during the heyday of realistic fiction, Gary K. Wolfe goes on to show how the fantastic reasserted itself in popular genre literature, and how these genres themselves grew increasingly unstable in terms of both narrative form and the worlds they portray. More detailed discussions of how specific contemporary writers have promoted this evolution are followed by a final essay examining how the competing discourses have led toward an emerging synthesis of critical approaches and vocabularies. The essays cover a vast range of authors and texts, and include substantial discussions of very

current fiction published within the last few years. *Schild's Ladder* Jul 19 2022 Cass has stumbled on something that might be an entirely different type of physics, and she's travelled three hundred and fifty light-years to Mimosa Station, a remote experimental facility, to test her theory. The novo-vacuum she creates is predicted to begin decaying the instant it's created, but even so short-lived a microscopic speck could shed new light on the origins of the universe. But instead of decaying, Cass's novo-vacuum is wildly successful and begins expanding, slowly but inexorably

taking over the universe ...

SCHILD'S LADDER: a wild ride through the far future by one of the world's most respected and acclaimed writers.

The Arrows of Time

Aug 08 2021 In an alien universe where space and time play by different rules, interstellar voyages last longer for the travellers than for those they left behind. After six generations in flight, the inhabitants of the mountain-sized spacecraft the Peerless have used their borrowed time to develop advanced technology that could save their home world from annihilation. But not every traveller feels allegiance to a

world they have never seen, and as tensions mount over the risks of turning the ship around and starting the long voyage home, a new complication arises: the prospect of constructing a messaging system that will give the Peerless news of its own future. While some of the crew welcome the opportunity to be warned of impending dangers - and perhaps even hear reports of the ship's triumphant return - others are convinced that knowing what lies ahead will be oppressive, and that the system will be abused. Agata longs for a chance to hear a message from the ancestors back on the home

world, proving that the sacrifices of the travellers have not been in vain, but her most outspoken rival, Ramiro, fears that the system will undermine every decision the travellers make. When a vote fails to settle the matter and dissent erupts into violence, Ramiro, Agata and their allies must seek a new way to bring peace to the Peerless - by traveling to a world where time runs in reverse. THE ARROWS OF TIME is the final volume of the Orthogonal trilogy, bringing a powerful and surprising conclusion to the epic story of the Peerless that began with THE CLOCKWORK ROCKET and THE

ETERNAL FLAME.

**The Nearest** Nov 30 2020 When a detective, a new mother, is assigned to the case of a horrific triple murder, it appears to be a self-contained domestic tragedy, a terrible event but something that doesn't affect the rest of the community. But it slowly becomes clear that something much darker may be at play, something that spreads out from the scene of the crime to corrode the closest relationships of everyone it touches, in Greg Egan's *The Nearest*, a Tor.com Original. At the Publisher's request, this title is being sold without Digital Rights Management

Software (DRM) applied.

**The Best of Greg Egan** Oct 10 2021 Twenty Stories and Novellas from Hugo, Campbell, and Locus Award Winner Greg Egan, Arguably Australia's Greatest Living Science Fiction Writer In a career spanning more than thirty years, Greg Egan has produced a steady stream of novels and stories that address a wide range of scientific and philosophical concerns: artificial intelligence, higher mathematics, science vs religion, the nature of consciousness, and the impact of technology on the human personality. All these ideas and more find their way into this generous

and illuminating collection, the clear product of a man who is both a master storyteller and a rigorous, exploratory thinker. *The Best of Greg Egan* contains twenty stories and novellas arranged in chronological order, and each of them is a brilliantly conceived, painstakingly developed gem. The book opens with "Learning to be Me," about a society in which the organic human brain can be replaced by a miraculous piece of technology called "the jewel," a "mock brain" that confers, among other things, a kind of immortality on its recipients. "Bit Players" - the opening movement

in a trio of tales that continues with "3-adica" and "Instantiation" - posits a world in which cheaply generated software beings are exploited for the basest commercial purposes. (Other sets of interconnected stories - all of them reprinted here - include the mathematically-themed "Luminous" and "Dark Integers," and a pair of stories centered on the complex marriage of a physicist and a mathematician: "Singleton" and "Oracle.") "Reasons to be Cheerful" concerns a young boy whose brain tumor has an unexpected effect on his life, moods, and view of the

world. "Axiomatic" tells the story of a society in which "implants" can be used to alter the human personality, with potentially lethal results. And the Hugo Award-winning novella "Oceanic" is a powerful account of a boy whose deeply held religious beliefs are undermined by what he comes to learn about the laws of the physical world. This book really does represent the best of Greg Egan, and it therefore takes its place among the best of contemporary SF. Startling, intelligent and always hugely entertaining, it provides an ideal introduction to one of the most

accomplished and original writers working today. This is an important and provocative collection, and it deserves a place on the serious science fiction reader's permanent shelf.

**A Companion to Science Fiction**  
Jan 21 2020 A  
Companion to Science Fiction

assembles essays by an international range of scholars which discuss the contexts, themes and methods used by science fiction writers. This Companion conveys the scale and variety of science fiction. Shows how science fiction has been used as a means of debating cultural issues. Essays by an international range of scholars discuss the contexts, themes and methods used by science fiction writers. Addresses general topics, such as the history and origins of the genre, its engagement with science and gender, and national variations of science fiction around the English-speaking world. Maps out

connections between science fiction, television, the cinema, virtual reality technology, and other aspects of the culture. Includes a section focusing on major figures, such as H.G. Wells, Arthur C. Clarke, and Ursula Le Guin. Offers close readings of particular novels, from Mary Shelley's *Frankenstein* to Margaret Atwood's *The Handmaid's Tale*. **Instantiation** Feb 14 2022 Instantiation is a collection of 11 stories by the Hugo award winning author Greg Egan: "The Discrete Charm of the Turing Machine" "Zero For Conduct" "Uncanny Valley" "Seventh Sight"

"The Nearest"  
"Shadow Flock"  
"Bit Players"  
"Break My Fall" "3-adica" "The Slipway"  
"Instantiation"  
*Incandescence* Oct 30 2020 The long-awaited new novel from Greg Egan! Hugo Award-winning author Egan returns to the field with *Incandescence*, a new novel of hard SF. *The Amalgam* spans nearly the entire galaxy, and is composed of innumerable beings from a wild variety of races, some human or near it, some entirely other. The one place that they cannot go is the bulge, the bright, hot center of the galaxy. There dwell the Aloof, who for millions of years have

deflected any and all attempts to communicate with or visit them. So when Rakesh is offered an opportunity to travel within their sphere, in search of a lost race, he cannot turn it down. Roi is a member of that lost race, which is not only lost to the Amalgam, but lost to itself. In their world, there is but toil, and history and science are luxuries that they can ill afford. Rakesh's journey will take him across millennia and light years. Roi's will take her across vistas of learning and discovery just as vast.

**Oceanic** Jan 13  
2022 Collected  
together here for  
the first time are

twelve stories by the incomparable Greg Egan, one of the most exciting writers of science fiction working today. In these dozen glimpses into the future Egan continues to explore the essence of what it is to be human, and the nature of what - and who - we are, in stories that range from parables of contemporary human conflict and ambition to far-future tales of our immortal descendants. Return to the universe of the meta-civilisation known as the Amalgam, which Egan explored in his critically acclaimed novel *Incandescence*: 'Riding the Crocodile', which

recounts an epic endeavour a million years from now to bridge the divide between the Amalgam and the reclusive Aloof; 'Glory', set in the same future, in which two archaeologists strive to decipher the artefacts of an ancient civilisation, and 'Hot Rock', where an obscure, sunless world conceals mind-spinning technological marvels, bitter factional struggles, and a many-layered secret history. This superb collection also includes the title story, the Hugo Award-winning 'Oceanic': a boy is inducted into a religion that becomes the centre of his life, but as an adult he must face

evidence that casts a new light on his faith.

**Quarantine** Feb 20 2020 “Taut, suspenseful, darkly powerful . . . Egan is on his way, and with considerable velocity!”

—Gardener Dozois, editor, *The Year's Best SF In 2034*, the stars went out. Riots and religions break out after an unknown agency surrounds the solar system with an impenetrable barrier, now leaving the universe in darkness. While some see this act as revenge from God, others see it as protection. The only thing known is that for now and forever, Earth and the universe shall never be connected again. Or so it seems. In 2067, PI

Nick Stavrianos is hired to investigate the disappearance of Laura, a mentally disabled woman. The trail leads him to the Republic of New Hong Kong, where an organization known as the Ensemble has uncovered Laura's secret and the only possible way she could have escaped from the institution: her ability to walk through walls. It's up to Nick not only to find out what the Ensemble plans to do with Laura, but also—if he can—to get her before her powers transform the world. Will it be for good or bad? That's the question Nick has to answer. From the mind of Hugo Award-winning author Greg Egan,

*Quarantine* is a tour de force of hard science fiction that will grip you from the first page and not let go.

Originally published more than twenty years ago, *Quarantine* is now back in print and available to readers again. Skyhorse Publishing, under our Night Shade and Talos imprints, is proud to publish a broad range of titles for readers interested in science fiction (space opera, time travel, hard SF, alien invasion, near-future dystopia), fantasy (grimdark, sword and sorcery, contemporary urban fantasy, steampunk, alternative history), and horror (zombies, vampires, and the occult and

supernatural), and much more. While not every title we publish becomes a New York Times bestseller, a national bestseller, or a Hugo or Nebula award-winner, we are committed to publishing quality books from a diverse group of authors.

*Greg Egan's Home Page* Mar 03 2021 Western Australian science fiction writer. The site includes information about Egan, text of stories and novella not published on paper, reviews, and a comprehensive bibliography of his publications.

*Reach For Infinity* Mar 23 2020 HUMANITY AMONG THE STARS What

happens when we reach out into the vastness of space? What hope for us amongst the stars? Multi-award winning editor Jonathan Strahan brings us fourteen new tales of the future, from some of the finest science fiction writers in the field. The fourteen startling stories in this anthology feature the work of Greg Egan, Aliette de Bodard, Ian McDonald, Karl Schroeder, Pat Cadigan, Karen Lord, Ellen Klages, Adam Roberts, Linda Nagata, Hannu Rajaniemi, Kathleen Ann Goonan, Ken MacLeod, Alastair Reynolds and Peter Watts.

**Gedanken Fictions** Nov 18

2019 [Dark Integers and Other Stories](#) Jun 06 2021 Features five science fiction stories dealing with the abuse of mathematical or physical concepts and the dire consequences on humanity's future.

*Greg Egan* Jan 25 2023 Greg Egan (1961- ) publishes works that challenge readers with rigorous, deeply-informed scientific speculation. He unapologetically delves into mathematics, physics, and other disciplines in his prose, putting him in the vanguard of the hard science fiction renaissance of the 1990s. A working physicist and engineer, Karen Burnham is

uniquely positioned to provide an in-depth study of Egan's science-heavy oeuvre. Her survey of the author's career covers novels like *Permutation City* and *Schild's Ladder* and the Hugo Award-winning novella "Oceanic," analyzing how Egan used cutting-edge scientific theory to explore ethical questions and the nature of humanity. As Burnham shows, Egan's collected works constitute a bold artistic statement: that science are equal to those of poetry and drama, and that science holds a place in the human condition as exalted as religion or art. The volume includes a rare

interview with the famously press-shy Egan covering his works, themes, intellectual interests, and thought processes. **Teranesia** Apr 16 2022 As a young boy, Prabir Suresh lives with his parents and sister on an otherwise uninhabited island in a remote part of the Indonesian peninsula. Prabir names it Teranesia, populating it with imaginary creatures even stranger than the evolutionarily puzzling butterflies that his parents are studying. Civil war strikes, orphaning Prabir and his sister. Eighteen years later, rumours of bizarre new species of plants and animals being discovered in the peninsula that

was their childhood home draw Prabir's sister back to the island - Prabir cannot bear for her to have gone out alone and he follows, persuading a pharmaceutical researcher to take him along as a guide.

**Diaspora** Jun 18 2022 In the 30th century, most people have chosen immortality, joining the polises to become conscious software. Others have opted for robot bodies, while some holdouts remain "fleshers." And then there's the Orphan, a genderless digital being grown from a mind seed. It's up to the Orphan and a group of refugees to find the knowledge that will save inhabitants

from extinction.
