This title provides a general introduction to Jewish law (Torah) for students of New Testament studies. This book will provide a general introduction to Jewish law (Torah) for students of New Testament studies. It will include a general discussion on the role of Jewish law in understanding Christian origins with particular reference to correcting the harsh and negative evaluations in a previous generation of scholarship and to showing how an understanding of Jewish law is extremely important in understanding the emergence of Christianity. There will also be a general chapter of the origins and sources of early Jewish law, including the biblical texts, the Dead Sea Scrolls, the pseudepigrapha, Josephus, Philo, and early rabbinic material. This will also provide a general introduction to the different ways Jewish law was interpreted. The rest of the book will be taken up by short chapters which will provide specific examples of Jewish law based on issues raised in the New Testament. These will include areas such as circumcision, Sabbath, food and purity, divorce, eye for an eye, family loyalties, ethnicity, and oaths. Throughout, the focus will not be on the 'correct' interpretation or historical accuracy of given gospel passages but rather the areas of Jewish law which illuminate the given New Testament passage. The idea is to provide readers with specific legal contexts for their own interpretations of New Testament passages. Concentrating specifically on what it is that makes the subject difficult to grasp, these books explain and explore key themes and ideas, guiding the reader towards a thorough understanding of demanding material. Moo's Law is the latest title from successful investor Jim Mellon, to help readers understand the investment landscape in cultivated and plant-based proteins and materials. Jim has a vision that within the next couple of decades world agriculture will be radically transformed by the advent of cultivated meat technology. This book

grounds the reader in why such an advancement is absolutely necessary and informs them of the investments they could make to become part of the New Agricultural Revolution themselves. The harrowing effects on our environment, animal cruelty in food and fashion, and the struggling ability to feed the world's ever-growing population gives us no choice but to grow meat in labs or derive our proteins from plant-based sources. Not only this, he outlines what he sees as the major hurdles to the industry's success in terms of scalability of production and the smart designing of regulatory frameworks to stimulate innovation in this sector. The future of food is being developed in labs across the world - it will be cleaner, safer, more ethical and, importantly soon, cheaper too! Once price parity with conventional meats is reached, there will be no turning back -- this is Moo's Law™. CRIMINAL LAW STUDY GUIDE provides a set of structured and organised outlines of all main offences and defenses under the Crimes Act 1961. The outlines provide a concise but comprehensive overview of the requirements of the main offences and defenses. Relevant definitions, applicable legal tests and common problems are directly incorporated into the outlines.
