This essay collection explores the phenomenon of "teen TV" in the United States, analyzing the meanings and manifestations of this category of programming from a variety of perspectives. Part One views teen television through an industrial perspective, examining how networks such as WB, UPN, The CW, and The N have created a unique economic framework based on demographic niches and teen-focused narrowcasting. Part Two focuses on popular teen programs from a cultural context, evaluating how such programs reflect and at times stretch the envelope of the cultural contexts in which they are created. Finally, Part Three explores the cultures of reception (including the realms of teen consumerism, fan discourse, and unofficial production) through which teens and consumers of teen media have become authors of the teenage experience in their own right. There are undercurrents and peripheral taste preferences that are a defining part of our individual and collective cultural experience. Music is no exception. George Plasketes adapts the iconic "A-side/B-side" dichotomy from the 45 r.p.m. for use as a unique conceptual, critical, historical, and cultural framework for exploring and threading together a variety of popular music and media texts. The profiles and perspectives focus on the peripheries; on texts which might be considered "B-sides" — overlooked, underappreciated, and unsung cases, creators, patterns and productions that have unassumingly, but significantly, marked popular culture, music and media during the past 40 years. The underappreciated yet enduring contributions of a variety of creative individuals in music, television and film are a centerpiece of this volume: actress Doris Day's son, Terry Melcher, a 1960s music producer whose imprint is on the surf, country blues, garage pop and most importantly the folk rock genre; Hans Fenger's kid chorus cover project, a musical variation of "outsider art" that became representative of the tribute wave that began in the 1990s and continues today; versatile guitarist virtuoso Ry Cooder's extensive film soundtrack work; World Music "missionary efforts" of American artists beyond Paul Simon's Graceland, including Neil Diamond's precursor with Tap Root Manuscript in the 1970s and the exotic adventures of Henry Kaiser and David Lindley in Madagascar and Norway — to name just a few examples. These B-sides represent undercurrents, but they resonate as overtones in the mainstream of music and culture, many as historical hinges. Collectively, these B-sides are an A-side antidote of outskirts observations, individual snapshots of artists, artifacts and rituals, genres and generations, producers and musical productions in television, film and video. They constitute an important connect-the-dots cultural chronicle with a multi-layered context — social, legal, historic, economic, technological, generational, aesthetic — for interpreting the interrelations between creators and institutions, the music market place, the production of culture and important connections between the peripheral and the popular. The right to imagine an individual will, the right to some form of self-determination and the right to self-legislation have long been at the forefront of popular music's approach to human rights. At a time of such uncertainty and confusion, with human rights currently being violated all over the world, a new and sustained examination of cultural responses to such issues is warranted. In this respect music, which is always produced in a social context, is an extremely useful medium; in its immediacy music has a potency of expression whose reach is long and wide. Innovator Award for Edited Collection from the Central States Communication Association (CSCA) Shonda Rhimes is one of the most powerful players in contemporary American network television. Beginning with her break-out hit series Grey's Anatomy, she has successfully debuted Private Practice, Scandal, How to Get Away with Murder, The Catch, For The People, and Station 19. Rhimes's work is attentive to identity politics, "post-" identity politics, power, and representation, addressing innumerable societal issues. Rhimes intentionally addresses these issues with diverse characters and story lines that center, for example, on interracial friendships and relationships, LGBTIQ relationships and parenting, the impact of disability on familial and work dynamics, and complex representations of womanhood. This volume serves as a means to theorize Rhimes's contributions and influence by inspiring provocative conversations about television as a deeply politicized institution and exploring how Rhimes fits into the implications of twenty-first century television. Taylor is known for his insightful essays on music, globalization, and capitalism. Music in the World is a collection of some of Taylor's most recent writings—essays concerned with questions about music in capitalist cultures, covering a historical span that begins in the late nineteenth and early twentieth centuries and continues to the present. These essays look at shifts in the production, dissemination, advertising, and consumption of music from the industrial capitalism of the nineteenth century to the globalized neoliberal capitalism of the past few decades. In addition to chapters on music, capitalism, and globalization, Music in the World includes previously unpublished essays on the continuing utility of the concept of culture in the study of music, a historicization of treatments of affect, and an essay on value and music. Taken together, Taylor's essays chart the changes in different kinds of music in twentieth- and twenty-first-century music and culture from a variety of theoretical
