easily adaptable to most any educational calendar. This apologetics study for upper elementary children delves into issues regarding the Bible, God, sin, dinosaurs, the Flood of Noah, salvation, astronomy, and more, and is all based on actual questions asked by kids. Answers are important. If children aren't given answers to their questions about the Bible and the history it reveals, they cannot defend their faith against a fallen world. The course highlights the unique collection of question-answer books from Ken Ham and the creative team at Answers in Genesis to meet this need and helps kids focus on Scripture memorization and faith-building truth. The Bible verses quoted in the Answers Book for Kids series are from the New King James Version, though kids are encouraged to write out their daily verses in the version they use each day. The Answers Book for Kids 1: The story of Creation and Adam and Eve in the Garden of Eden are familiar Bible stories. But they also present a wonderful opportunity to

New technologies are radically changing the way that families connect with one another: we can text our teenagers from work, eat dinner with far-away parents via video link, and instantly upload and share photos after a family day out. alter the communication landscape, they in turn are changing the way we conduct and experience family life. This state of the art volume explores the impact of new communication systems on how families interact - how they share their lives and routines, engage in social touch, and negotiate being together or being apart - by considering a range of different family relationships that shape the nature of communication. Composed of three sections, the first looks at what is often the core of a 'family', the couple, to understand the impact of technology on couple relationships, communication, and feelings of closeness. The second section studies immediate families that have expanded beyond just the individual or couple to include children. Here, the emphasis is on connection for communication, coordination, and play. The third section moves beyond the immediate family to explore connections between extended, distributed family members. This includes connections between adult

children and their parents, grandparents and grandchildren, and adult siblings. Here family members have grown older, moved away from 'home', and forged new families. Researchers, designers and developers of new communication technologies will find this volume invaluable.

Connecting Families: The Impact of New Communication Technologies on Domestic Life brings together the most up-to-date studies to help in understanding how new communication technologies shape - and are shaped by - family life, and offers inspiration and guidance for design by making clear what families need and value from technological systems.
