The state bounds politics: it constructs and enforces boundaries that separate what it controls from what lies outside its domain. However, states face a variety of threats that cross and challenge their geographical and conceptual boundaries. Transnational violent actors that transcend these boundaries also defy the state's claims to political authority and legitimacy. Mark Shirk examines historical and contemporary state responses to transnational violence to develop a new account of the making of global orders. He considers a series of crises that plagued the state system in different eras: golden-age piracy in the eighteenth century, anarchist "propagandists of the deed" at the turn of the twentieth, and al-Qaeda in recent years. Shirk argues that states redraw conceptual boundaries, such as between "international" and "domestic," to make sense of and defeat transnational threats. In response to forms of political violence that challenged boundaries, states developed creative responses that included new forms of control, surveillance, and rights. As a result, these responses gradually made and transformed the state and global order. Shirk draws on extensive archival research and interviews with policy makers and experts, and he explores the implications for understandings of state formation. Combining rich detail and theoretical insight, *Making War on the World* reveals the role of pirates, anarchists, and terrorists in shaping global order. "By exploring literary works of still life by Wallace Stevens, William Carlos Williams, Elizabeth Bishop, and Richard Wilbur - as well as the art of Joseph Cornell - the eminent critic Bonnie Costello considers how exchanges between the arts help to establish vital thresholds between the personal and public realms. In her view, Stevens and Williams bring the turmoil of history into their struggle for local aesthetic order; Bishop "studies history" in the intimate objects and arrangements she finds in her travels; Cornell, an artist inspired by poetry and loved by poets, links his dream boxes to contemporary events; and Richard Wilbur seeks to mend a broken postwar world within the hospitable spheres of art and home. A delightful collection of soul-inspiring poems from the world's great religious and spiritual traditions, accompanied by Ivan M. Granger's meditative thoughts and commentary. Rumi, Whitman, Issa, Teresa of Avila, Dickinson, Blake, Lalla, and many others. These are poems of seeking and awakening... and the longing in between. ----- Praise for *The Longing in Between* "The Longing in Between is a work of sheer beauty. Many of the selected poems are not widely known, and Ivan M. Granger has done a great service, not only by bringing them to public attention, but by opening their deeper meaning with his own rare poetic and mystic sensibility." ROGER HOUSDEN author of the best-selling *Ten Poems to Change Your Life* series "Ivan M.

Granger's new anthology, *The Longing in Between*, gives us a unique collection of profoundly moving poetry. It presents some of the choicest fruit from the flowering of mystics across time, across traditions and from around the world. After each of the poems in this anthology Ivan M. Granger shares his reflections and contemplations, inviting the reader to new and deeper views of the Divine Presence. This is a grace-filled collection which the reader will gladly return to over and over again." Many Christians have been preaching the gospel of salvation and attempting to disciple the nations by bringing people into their church congregations, but they have not seen their cities and countries transformed. Jesus, however, preached the Gospel of the Kingdom, and He equipped and empowered His disciples to turn the world upside down in a drastic cultural transformation. In the Bible, mountains usually represent the authority of kingdoms. Learn how you can occupy the seven mountains of authority—family, church, business, government, education, arts/entertainment, and media—and bring Heaven's influence to earth, transforming your culture and discipling the nations! You will learn: How the Gospel of the Kingdom turns the world upside down. What the seven mountains of authority are. How to take your mountains with the Gospel. To step into your destiny as a world-changer! Maiden writes: "You were predestined for a reason and purpose by God! Your gifts, anointing, personality, and history will all synergize into a dynamic purpose when you find your mountain!" Tackle your mountain today! Examining a series of El Niño-induced droughts and the famines that they spawned around the globe in the last third of the 19th century, Mike Davis discloses the intimate, baleful relationship between imperial arrogance and natural incident that combined to produce some of the worst tragedies in human history. *Late Victorian Holocausts* focuses on three zones of drought and subsequent famine: India, Northern China; and Northeastern Brazil. All were affected by the same global climatic factors that caused massive crop failures, and all experienced brutal famines that decimated local populations. But the effects of drought were magnified in each case because of singularly destructive policies promulgated by different ruling elites. Davis argues that the seeds of underdevelopment in what later became known as the Third World were sown in this era of High Imperialism, as the price for capitalist modernization was paid in the currency of millions of peasants' lives. As world travel is growing exponentially, "alternative" travel has grown apace: from ecotourism, gap years, short-term mission trips, cultural travel-study tours, and foreign language study, to college-level study abroad, "voluntourism", and international service-learning. This book is intended to help the new generation of ethical and educational travelers make the most of their international experience, and show them how to broaden their cultural horizons while also making a contribution to their host community. This book guides independent and purposeful learners considering destinations off the "beaten path" on connecting with a wider world. Whether traveling on their own, or as part of a group arranged by an educational institution, humanitarian organization, or congregation, this book will enable them to make their international encounter rewarding, authentic, enriching, and learning-oriented. This book draws on the author's extensive travel and many years of guiding college students' global learning. Richard Slimbach offers a comprehensive framework for pre-field preparation that includes, but goes beyond, discussions of packing lists and assorted "do's and don'ts" to consider the ultimate purposes and practical learning strategies needed to enter deeply into a host culture. It also features an in-depth look at the post-sojourn process, helping the reader integrate the experiences and insights from the field into her or his studies and personal life. This book constitutes a vital road map for anyone intent on having their whole being—body, mind, and heart—stretched through the intercultural experience. *Becoming World Wise* offers an integrated approach to cross-cultural learning aimed at transforming our consciousness while also contributing to the flourishing of the communities that host us. While primarily intended for foreign study and service situations, the ideas are just as relevant to intercultural learning within domestic settings. In a "globalized" world, diverse cultures intermingle near and far, at home and abroad. What if the path toward an extraordinary life is becoming more ordinary? Ordinary is not a call to be more radical. If anything, it is a call to the contrary. The kingdom of God isn't coming with light shows, and shock and awe, but

with lowly acts of service. Tony Merida wants to push back against sensationalism and “rock star Christianity,” and help people understand that they can make a powerful impact by practicing ordinary Christianity. Through things such as humble acts of service, neighbor love, and hospitality, Christians can shake the foundations of the culture. In order to see things happen that have never happened before, Christians must do what Christians have always done. Christians need to become more ordinary. Let’s think together about how we, ordinary people, doing ordinary things, might turn the world upside down. It is the task of the IIAS and the UNDESA to track and focus on changes in the atmosphere of world governance and public administration. This work shows that a new prestige has been earned by public servants, who are performing a public good, and who are in the centre of the turning world. Celebrates 20 years of LIFT through first-person narratives from its directors as well as essays by international commentators on the Festival's lasting impact on theatre in the UK. Scottish inventor and mechanical engineer James Watt (1736–1819) is best known for his pioneering work on the steam engine that became fundamental to the incredible changes and developments wrought by the Industrial Revolution. But in this new biography, Ben Russell tells a much bigger, richer story, peering over Watt’s shoulder to more fully explore the processes he used and how his ephemeral ideas were transformed into tangible artifacts. Over the course of the book, Russell reveals as much about the life of James Watt as he does a history of Britain’s early industrial transformation and the birth of professional engineering. To record this fascinating narrative, Russell draws on a wide range of resources—from archival material to three-dimensional objects to scholarship in a diversity of fields from ceramics to antique machine-making. He explores Watt’s early years and interest in chemistry and examines Watt’s partnership with Matthew Boulton, with whom he would become a successful and wealthy man. In addition to discussing Watt’s work and incredible contributions that changed societies around the world, Russell looks at Britain’s early industrial transformation. Published in association with the Science Museum London, and with seventy illustrations, *James Watt* is not only an intriguing exploration of the engineer’s life, but also an illuminating journey into the broader practices of invention in the eighteenth and early nineteenth centuries. Published in association with the Science Museum, London *Revealing the central yet intentionally obliterated role of Africa in the creation of modernity*, *Born in Blackness* vitally reframes our understanding of world history. Traditional accounts of the making of the modern world afford a place of primacy to European history. Some credit the fifteenth-century Age of Discovery and the maritime connection it established between West and East; others the accidental unearthing of the “New World.” Still others point to the development of the scientific method, or the spread of Judeo-Christian beliefs; and so on, ad infinitum. The history of Africa, by contrast, has long been relegated to the remote outskirts of our global story. What if, instead, we put Africa and Africans at the very center of our thinking about the origins of modernity? In a sweeping narrative spanning more than six centuries, Howard W. French does just that, for *Born in Blackness* vitally reframes the story of medieval and emerging Africa, demonstrating how the economic ascendancy of Europe, the anchoring of democracy in the West, and the fulfillment of so-called Enlightenment ideals all grew out of Europe’s dehumanizing engagement with the “dark” continent. In fact, French reveals, the first impetus for the Age of Discovery was not—as we are so often told, even today—Europe’s yearning for ties with Asia, but rather its centuries-old desire to forge a trade in gold with legendarily rich Black societies sequestered away in the heart of West Africa. Creating a historical narrative that begins with the commencement of commercial relations between Portugal and Africa in the fifteenth century and ends with the onset of World War II, *Born in Blackness* interweaves precise historical detail with poignant, personal reportage. In so doing, it dramatically retrieves the lives of major African historical figures, from the unimaginably rich medieval emperors who traded with the Near East and beyond, to the Kongo sovereigns who heroically battled seventeenth-century European powers, to the ex-slaves who liberated Haitians from bondage and profoundly altered the course of American history. While French cogently demonstrates the centrality of Africa to the rise of the modern world, *Born in Blackness* becomes, at the same time, a far more significant narrative, one that reveals a long-concealed history of trivialization and, more

often, elision in depictions of African history throughout the last five hundred years. As French shows, the achievements of sovereign African nations and their now-far-flung peoples have time and again been etiolated and deliberately erased from modern history. As the West ascended, their stories—siloes and piecemeal—were swept into secluded corners, thus setting the stage for the hagiographic “rise of the West” theories that have endured to this day. “Capacious and compelling” (Laurent Dubois), *Born in Blackness* is epic history on the grand scale. In the lofty tradition of bold, revisionist narratives, it reframes the story of gold and tobacco, sugar and cotton—and of the greatest “commodity” of them all, the twelve million people who were brought in chains from Africa to the “New World,” whose reclaimed lives shed a harsh light on our present world. Learn to make creativity work for your career. Anyone, regardless of who you are or what you do, can cultivate the habits, actions, and attitudes that inspire creativity and innovation. *How Creativity Rules the World* shows that creativity is an inexhaustible resource available to everyone. It can be taught to all and is the key to thriving in the business world and beyond. This timeless guide promises to make the creative process of successful seven-figure artists and billion-dollar entrepreneurs—as well as Maria’s own—accessible and actionable for you to take the power of their ideas to the next level. Contemporary art curator and writer of the popular newsletter, *The Groove*, Maria Brito discovered the power of creativity when she transitioned from being an unhappy Harvard-trained corporate lawyer to a thriving entrepreneur and innovator in the art world. After applying the principles in *How Creativity Rules the World* to her own business, Maria started teaching them to hundreds of people, ranging from entrepreneurs to artists to CEOs. Proven by her students’ creative successes, Maria will guide you to strike gold with your ideas as well. In *How Creativity Rules the World*, you will learn how to: Overcome limiting thoughts and dispel myths about creativity. Unleash creativity through concrete data, historical passages, and examples of modern entrepreneurship. Develop timeless habits, principles, and tools that worked six centuries ago and continue to work today. Employ creativity in an everyday context to produce extraordinary results. With revealing studies and stories spanning business and art, this book is a deep dive into history, culture, psychology, science, and entrepreneurship; analyzing the elements used by some of the most creative minds throughout the last 600 years. There has never been a more crucial time than now to develop your creativity and your ability to innovate. Coming up with original ideas of value is today’s most precious skill. The twenty-first century has witnessed a resurgence of economic inequality, racial exclusion, and political hatred, causing questions of collective identity and belonging to assume new urgency. In *Making Worlds*, Claudia Breger argues that contemporary European cinema provides ways of thinking about and feeling collectivity that can challenge these political trends. Breger offers nuanced readings of major contemporary films such as Michael Haneke’s *The White Ribbon*, Alejandro González Iñárritu’s *Biutiful*, Fatih Akin’s *The Edge of Heaven*, Asghar Farhadi’s *A Separation*, and Aki Kaurismäki’s refugee trilogy, as well as works by Jean-Luc Godard and Rainer Werner Fassbinder. Through a new model of cinematic worldmaking, Breger examines the ways in which these works produce unexpected and destabilizing affects that invite viewers to imagine new connections among individuals or groups. These films and their depictions of refugees, immigrants, and communities do not simply counter dominant political imaginaries of hate and fear with calls for empathy or solidarity. Instead, they produce layered sensibilities that offer the potential for greater openness to others’ present, past, and future claims. Drawing on the work of Latour, Deleuze, and Rancière, Breger engages questions of genre and realism along with the legacies of cinematic modernism. Offering a rich account of contemporary film, *Making Worlds* theorizes the cinematic creation of imaginative spaces in order to find new ways of responding to political hatred. This book addresses the issues concerned with the achievement of world class competitiveness by major international companies. It is the story of creating success where failure was endemic and demonstrating that so-called Japanese management techniques can be applied elsewhere by other western companies to attain market supremacy. It is a book based on personal experience but related to theory and thus is of use to the reader trying to change where they work for the better as well as providing answers to a number of commonly asked questions: * Why are the Japanese so

consistently successful? * Can we compete and become World Class using our culture and Japanese management techniques? * Is there a manufacturing future for the UK and Europe in the face of competition from the Pacific Basin? * How do we achieve world class competitiveness? How do you start this in your business? Argues that as China, India, Brazil and other emerging powers rise, the founding ideals of the West will not continue to spread, and that in the near future, Europe and the United States will need to fashion a new consensus with these powers on issues of legitimacy, sovereignty and governance. Presents a collection of physics demonstrations that illustrate key concepts using easily accessible materials, with information providing a theoretical background for each demonstration From the time of the desert fathers to our own "post-Christian" age, the literature of monastic wisdom has provided inspiration for those of us who lead ordinary lives in the world. Father Jeremy Driscoll, a poet and theologian who is also a Benedictine monk, brings the genre into the twenty-first century with this exquisitely written collection of reflections on life from a monastic perspective. Whether reflecting on the details of the cloistered life, or observing the weirdness of American culture, explaining a fine point of Catholic theology to a child, or meditating on the flight of a seagull over the glittering ocean at sunrise, Fr. Jeremy's voice both enchants and provokes us to further contemplation. The 187 meditations are arranged by short titles in alphabetical order to emphasize that the reader should approach them in random fashion, without preconceived ideas, in order to be open to where they lead the heart and mind. The photographic image is imbued with stillness. No movement, no sound, no time. But what happens if you add one of these missing elements? 'The Still Point of the Turning World' focuses on that rare moment in which a photographer turns towards film or a video artist turns towards photography. What beauty can be found on the border between these two media? This photo-filmic book coincides with an exhibition at FOMU, Antwerp, but takes up its own position in this debate. The book shows 24 artists pairing both photographic and filmic works and includes essays by David Company and Joachim Naudts. Exhibition: FOMU Antwerpen, Belgium (23.06.-01.10.2017). The secret to making the right call in an increasingly complex world The decisions we make every day - frequently automatic and incredibly fast - impact every area of our lives. The Little Black Book of Decision Making delves into the cognition behind decision making, guiding you through the different ways your mind approaches various scenarios. You'll learn to notice that decision making is a matter of balance between your rational side and your intuition - the trick is in honing your intuition to steer you down the right path. Pure reasoning cannot provide all of the answers, and relying solely on intuition could prove catastrophic in business. There must be a balance between the two, and the proportions may change with each situation. This book helps you quickly pinpoint the right mix of logic and 'gut feeling,' and use it to find the best possible solution. Balance logic and intuition in your decision making approach Avoid traps set by the mind's inherent bias Understand the cognitive process of decision making Sharpen your professional judgement in any situation Decision making is the primary difference between organisations that lead and those that struggle. The Little Black Book of Decision Making helps you uncover errors in thinking before they become errors in judgement. A publishing phenomenon and artistic project, cartonera was born in the wake of Argentina's 2001 economic crisis. Infused with a rebellious spirit, it has exploded in popularity, with hundreds of publishers across Latin America and Europe making colorful, low-cost books out of cardboard salvaged from the street. Taking Form, Making Worlds is the first comprehensive study of cartonera. Drawing on interdisciplinary research conducted across Mexico, Brazil, and Argentina, the authors show how this hands-on practice has fostered a politically engaged network of writers, artists, and readers. More than a social movement, cartonera uses texts, workshops, encounters, and exhibitions to foster community and engagement through open-ended forms that are at once artistic and social. For various groups including waste-pickers, Indigenous communities, rural children, and imprisoned women, cartonera provides a platform for unique stories and sparks collaborations that bring the walls of the "lettered city" tumbling down. In contexts of stigma and exclusion, cartonera collectives give form to a decolonial aesthetics of resistance, making possible a space of creative experimentation through which plural worlds can be brought to life. The prominent political theorist

William E. Connolly outlines a political philosophy for the contemporary world: a world whose powers of creative evolution include and exceed the human estate. The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing. **THE NEW YORK TIMES BESTSELLER** With a new chapter detailing the events that have taken place since Ronan's passing in February 2013. Like all mothers, Emily Rapp had ambitious plans for her son, Ronan. He would be smart, loyal, physically fearless, level-headed but fun. He would be good at crossword puzzles like his father. He would be an avid skier like his mother. Rapp would speak to him in foreign languages and give him the best education. But all of these plans changed when Ronan was diagnosed at nine months old with Tay-Sachs disease, a rare and always-fatal degenerative disorder. Ronan was not expected to live beyond the age of three; he would be permanently stalled at a developmental level of six months. Rapp and her husband were forced to re-evaluate everything they thought they knew about raising a family. They would have to learn to live with their child in the moment; to find happiness in the midst of sorrow; to parent without a future. *The Still Point of the Turning World* is the story of a mother's journey through grief and beyond it. Rapp's response to her son's diagnosis was a belief that she needed to 'make my world big' - to make sense of her family's situation through art, literature, philosophy, theology and myth. Drawing on a broad range of thinkers and writers, from C.S. Lewis to Sylvia Plath, Hegel to Mary Shelley's *Frankenstein*, Rapp learns what wisdom there is to be gained from parenting a terminally ill child. In luminous, exquisitely moving prose, she re-examines our most fundamental assumptions about what it means to be a good parent, to be a success, and to live a meaningful life. Emily Rapp Black's follow up memoir, *Sanctuary*, will publish in January 2021. How tech companies like Google, Airbnb, StubHub, and Facebook learn from experiments in our data-driven world—an excellent primer on experimental and behavioral economics Have you logged into Facebook recently? Searched for something on Google? Chosen a movie on Netflix? If so, you've probably been an unwitting participant in a variety of experiments—also known as randomized controlled trials—designed to test the impact of different online experiences. Once an esoteric tool for academic research, the randomized controlled trial has gone mainstream. No tech company worth its salt (or its share price) would dare make major changes to its platform without first running experiments to understand how they would influence user behavior. In this book, Michael Luca and Max Bazerman explain the importance of experiments for decision making in a data-driven world. Luca and Bazerman describe the central role experiments play in the tech sector, drawing lessons and best practices from the experiences of such companies as StubHub, Alibaba, and Uber. Successful experiments can save companies money—eBay, for example, discovered how to cut \$50 million from its yearly advertising budget—or bring to light something previously ignored, as when Airbnb was forced to confront rampant discrimination by its hosts. Moving beyond tech, Luca and Bazerman consider experimenting for the social good—different ways that governments are using experiments to influence or “nudge” behavior ranging from voter apathy to school absenteeism. Experiments, they argue, are part of any leader's toolkit. With this book, readers can become part of “the experimental revolution.” In Aristotle’s *Ever-turning World in Physics 8* Blyth analyses the reasoning in Aristotle’s explanation of cosmic movement, with detailed evaluation of ancient and modern commentary on this central text in the history of ancient and medieval philosophy and science. *Turning the World Upside Down* is a search to understand what is happening and what it means for us all. It is based on Nigel Crisp's own journey from running the largest health system in the world to working in some of

the poorest countries, and draws upon his own experiences to explore new ideas and innovations around the world. The book has three unique features: Describes what rich countries can learn from poorer ones, as well as the other way round Deals with health in rich and poor countries in the same way, not treating them as totally different, and suggests that instead of talking about international development we should talk about co-development Sets out a new vision for global health, and our rights and accountabilities as citizens of the world There is an unfair import export business in people and ideas that flourishes between rich and poor countries. Rich countries import trained health workers and export their ideas and ideology about health in poorer ones, whether or not they are appropriate or useful. What, Nigel Crisp asks, if we were to turn the world upside down - so the import export business was reversed and poorer countries exported their ideas and experience whilst richer ones exported their health workers? Health leaders in poorer countries, without the resources or the baggage of rich countries, have learned to innovate, to build on the strengths of the population and their communities and develop new approaches that are relevant for the rich and poor alike. At the same time, richer countries and their health workers could help poorer countries to train, in their own country, the workers they need for the future. They would help pay a debt for all the workers who have migrated and learn themselves the new ways of working, which they will need in the 21st Century. We could stop talking about international development - as something the rich world does to the poor - and start talking about co-development, our shared learning and shared future. There is already a movement of people and ideas travelling in this direction. Young people get this intuitively. Many thousands of young professionals want a different professional education for themselves - in global health. Together with the leaders from poorer countries and the innovators around the world, they are creating a new global vision for health. Turning the World Upside Down is a search for understanding that helps us to see how Western Scientific Medicine, which has served us so well in the 20th Century, needs to adapt and evolve to cope with the demands of the 21st Century. It sets out a new vision and concludes by describing the actions we need to take to accelerate the change. The book draws on the evidence of landscape archaeology, palaeoenvironmental studies, ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape. It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable. The premise is that archaeologists tend to focus on "sites" while neglecting the patterns of habitual movement that made them part of living landscapes. Evidence of past movement is considered in a multi-scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement. It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations. In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change. Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning, animal movement, faeces deposition and transplantation which can create readable routes along which are favoured resources. Evidence from European hunter-gatherer sites hints at similar practices of niche construction on a range of spatial scales. On a local scale, footprints help to establish axes of movement, the locations of lost settlements and activity areas. Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location. Among early farming communities alignments of burial mounds, enclosure entrances and other monuments indicate axes of communication. From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields. Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long-term continuity of routeways. Where fields flank routeways a range of methods, including scientific approaches, provide dates. Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones. The book concludes with a case study of the Weald of South East

England which demonstrates that some axes of cross topographic movement used as droveways, and generally considered as early medieval, can be shown to be of prehistoric origin. One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication. It is argued that understanding the origins of the paths we use today contributes to appreciation of the distinctive qualities of landscapes. Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places. In these ways an understanding of past routeways can contribute to sustainable landscapes, communities and quality of life

A bomb goes off on a college campus. A shaken Sara and Omar first notice each other. Their eyes lock and there it is - a beginning sparked in chaos, an end foretold. Four years later, their story is remembered, retold by friends, spoken of fondly by their teachers. That story unfolds between these covers: one about the noise that balloons make when they burst; of lessons on using your mother's death to your advantage; about a cry for help even though all you did was barely scrape your knee; about running faster than the wind, climbing mountains, and learning how to keep your balance in a thunderstorm. This is a tale of Pakistan and what it means to live and love in apocalyptic times. It is an ode to life in college - with all its hopes and despairs, plans and uncertainties, falling in love and trying to keep up the grades, figuring the possibilities of the self and letting go of who we are. Sheheryar B. Sheikh's *The Still Point of the Turning World* is a haunting meditation on young people and their awakening - into adulthood, romance and a political space that is constantly shifting around them. Born with a congenital condition that led to the amputation of her left leg, a former March of Dimes poster child offers an unflinching, brutally honest, and often darkly humorous account of wrestling with the tyranny of self-image and ultimately coming to terms with her own body. The last major verse written by Nobel laureate T. S. Eliot, considered by Eliot himself to be his finest work *Four Quartets* is a rich composition that expands the spiritual vision introduced in "The Waste Land." Here, in four linked poems ("Burnt Norton," "East Coker," "The Dry Salvages," and "Little Gidding"), spiritual, philosophical, and personal themes emerge through symbolic allusions and literary and religious references from both Eastern and Western thought. It is the culminating achievement by a man considered the greatest poet of the twentieth century and one of the seminal figures in the evolution of modernism. An invitation to love like Jesus and step beyond distraction and division into the joy we long to experience—from the author of *The Deeply Formed Life*, winner of the Christianity Today Book Award "A stunning book with power to reshape our world . . . if we let it."—Glenn Packiam, pastor and author of *Blessed Broken Given* We long for a good life, a beautiful life, a kind life. But clearly that's not the world we live in. We carry the stress of our fractured world in our bodies and relationships. Families that once gathered around tables have converted those tables into walls. Hostility, rage, and offense is the language of our culture. How did we lose goodness, kindness, and beauty? And more important, how do we get them back into our lives? These are the two questions crying out in our streets, homes, churches, and from deep within our souls. Pastor and author Rich Villodas is convinced that only Jesus offers a way of being human that is both strong and tender enough to tear down the walls of hostility we experience daily. In *Good and Beautiful and Kind*, he reveals how...

- These three essentials are stolen by sin, powers and principalities, and trauma.
- We can get goodness, beauty, and kindness back through contemplative prayer, humility, and the cultivation of calm presence.
- The traits of healthy conflict, forgiveness, and justice lead to wholeness, healing, and a new collective future—when rooted in the ancient way of Jesus. Filled with fresh energy, classic truth, and practical solutions, this is your road map for stepping beyond distraction and division to love like Jesus. Doing so will change the atmosphere within you...and around you!

The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will

impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all. A riveting debut novel from an unforgettable new voice that is both literary, suspenseful, and a compelling story about identity and how you define "home".

Masha remembers her childhood in the former USSR, but found her life and heart in Israel. Anna was just an infant when her family fled, but yearns to find her roots. When Anna is contacted by a stranger from their homeland and then disappears, Masha is called home to Milwaukee to find her. In 2008, college student Anna feels stuck in Milwaukee, with no real connections and parents who stifle her artistic talents. She is eager to have a life beyond the heartland. When she's contacted online by a stranger from their homeland—a girl claiming to be her long lost sister—Anna suspects a ruse or an attempt at extortion. But her desperate need to connect with her homeland convinces her to pursue the connection. At the same time, a handsome grifter comes into her life, luring her with the prospect of a nomadic lifestyle. Masha lives in Israel, where she went on Birthright and unexpectedly found home. When Anna disappears without a trace, Masha's father calls her back to Milwaukee to help find Anna. In her former home, Masha immerses herself in her sister's life—which forces her to recall the life she, too, had left behind, and to confront her own demons. What she finds in her search for Anna will change her life, and her family, forever. *New York Times Bestseller* • The startling true history of how one extraordinary man from a remote corner of the world created an empire that led the world into the modern age. The Mongol army led by Genghis Khan subjugated more lands and people in twenty-five years than the Romans did in four hundred. In nearly every country the Mongols conquered, they brought an unprecedented rise in cultural communication, expanded trade, and a blossoming of civilization. Vastly more progressive than his European or Asian counterparts, Genghis Khan abolished torture, granted universal religious freedom, and smashed feudal systems of aristocratic privilege. From the story of his rise through the tribal culture to the explosion of civilization that the Mongol Empire unleashed, this brilliant work of revisionist history is nothing less than the epic story of how the modern world was made. As with her prior book *King Lear and the Gilded Age* (1935), *Lady Decies' Turn of the World* (1937) is a fascinating semi-autobiographical history of American high society during the Gay Nineties through the first World War. Upon the book's publication, *The Pittsburgh Press* wrote, "The magnificent spectacle that went on behind the scenes in pre-war days of society's Gilded Age at Saratoga, Newport, New York and Paris is detailed by an insider, Elizabeth, Lady Decies, who was Miss Elizabeth Wharton Drexel... interesting, amusing and sometimes revolting, as with evident nostalgia she tells of extravagant parties and fortunes spent for clothes and jewels." Like all mothers, Emily Rapp had ambitious plans for her first and only child, Ronan. He would be smart, loyal, physically fearless, and level-headed, but fun. He would be good at crossword puzzles like his father. He would be an avid skier like his mother. Rapp would speak to him in foreign languages and give him the best education. But all of these plans changed when Ronan was diagnosed at nine months old with Tay-Sachs disease, a rare and always-fatal degenerative disorder. Ronan was not expected to live beyond the age of three; he would be permanently stalled at a developmental level of six months. Rapp and her husband were forced to re-evaluate everything they thought they knew about parenting. They would have to learn to live with their child in the moment; to find happiness in the midst of sorrow; to parent without a future. *The Still Point of the Turning World* is the story of a mother's journey through grief and beyond it. Rapp's response to her son's diagnosis was a belief that she needed to "make my world big"—to make sense of her family's situation through art, literature, philosophy, theology and myth. Drawing on a broad range of thinkers and writers, from C.S. Lewis to Sylvia Plath, Hegel to Mary Shelley's *Frankenstein*, Rapp learns what wisdom there is to be gained from parenting a terminally ill child. In luminous, exquisitely moving prose she re-examines our most fundamental assumptions

about what it means to be a good parent, to be a success, and to live a meaningful life. A poetry collection of “playful and crooning lyricism” from the National Book Award- and Pulitzer Prize-winning author of *The Color Purple* (Booklist). In this dazzling new collection, Alice Walker offers over sixty new poems to incite and nurture contemporary activists. Hailed as a “lavishly gifted writer,” Walker imbues her poetry with evocative images, fresh language, anger, forgiveness, and profound wisdom (The New York Times). Casting her eye toward history, politics, and nature, as well as to world figures such as Jimmy Carter, Gloria Steinem, and the Dalai Lama, she “distills struggles, crises, and tragedies down to bright, singing lessons in living with awareness and joy” (Booklist). By attentively chronicling the conditions of human life today, Walker shows, as ever, her deep compassion, profound spirituality, and necessary political commitments. The poems in *The World Will Follow Joy* remind us of our human capacity to come together and take action, even in our troubled political times. “Her spirituality, concern for human rights, and almost old-fashioned, determined joyousness run deep and her devoted readers will want to follow her as she turns ‘madness into flowers’” (Library Journal). #1 NATIONAL BESTSELLER • A passionate call to arms against our era’s most pervasive human rights violation—the oppression of women and girls in the developing world. From the bestselling authors of *Tightrope*, two of our most fiercely moral voices With Pulitzer Prize winners Nicholas D. Kristof and Sheryl WuDunn as our guides, we undertake an odyssey through Africa and Asia to meet the extraordinary women struggling there, among them a Cambodian teenager sold into sex slavery and an Ethiopian woman who suffered devastating injuries in childbirth. Drawing on the breadth of their combined reporting experience, Kristof and WuDunn depict our world with anger, sadness, clarity, and, ultimately, hope. They show how a little help can transform the lives of women and girls abroad. That Cambodian girl eventually escaped from her brothel and, with assistance from an aid group, built a thriving retail business that supports her family. The Ethiopian woman had her injuries repaired and in time became a surgeon. A Zimbabwean mother of five, counseled to return to school, earned her doctorate and became an expert on AIDS. Through these stories, Kristof and WuDunn help us see that the key to economic progress lies in unleashing women’s potential. They make clear how so many people have helped to do just that, and how we can each do our part. Throughout much of the world, the greatest unexploited economic resource is the female half of the population. Countries such as China have prospered precisely because they emancipated women and brought them into the formal economy. Unleashing that process globally is not only the right thing to do; it’s also the best strategy for fighting poverty. Deeply felt, pragmatic, and inspirational, *Half the Sky* is essential reading for every global citizen. A new edition of the bestselling classic – published with a special introduction to mark its 10th anniversary This pioneering account sets out to understand the structure of the human brain – the place where mind meets matter. Until recently, the left hemisphere of our brain has been seen as the ‘rational’ side, the superior partner to the right. But is this distinction true? Drawing on a vast body of experimental research, Iain McGilchrist argues while our left brain makes for a wonderful servant, it is a very poor master. As he shows, it is the right side which is the more reliable and insightful. Without it, our world would be mechanistic – stripped of depth, colour and value. “Genetic Turning Points is an outstanding study of the problem of genetic engineering and related ethical issues. It addresses difficult and sometimes technical matters in a style that is both clear and scholarly, and it provides valuable insights into issues that are being thrust to the fore by scientific progress. Genes store the directions for all life on earth. If you want to know where we might be going, read this book. It is a road map that can save you from many ill-fated journeys.”--William R. Shea.
