The teaching procedures are organized by teaching topics, and each includes: o a clearly defined purpose o detailed instructions, activities, learning tasks and exercises o reinforcing games o lists of responses which children may make o application in whole class, small group and individual settings o a link to the Learning Framework in Number (see Early Numeracy- second edition, 2005) o how the guiding principles for teaching can be used to allow teachers to evaluate and reflect upon their practice Primary practitioners in Australia, the United States, the United Kingdom and Canada have tested the teaching procedures which can be used in conjunction with each country's numeracy strategy. Despite the wire fence separating them, the two boys become best friends.
